

## INDEPENDENT ENGINEER'S CERTIFICATE

August 12, 2024

Reference is hereby made to the Note Purchase Agreement, dated as of December 22, 2021, by and among Matrix Renewables Chile SpA, a *sociedad por acciones* formed under the laws of Chile (the “Issuer”), each Person from time to time party thereto as purchasers (jointly, the “Purchasers”), each Guarantor from time to time party thereto and each other Person that from time to time becomes a party thereto (as amended, amended and restated, supplemented or otherwise modified from time to time, the “Note Purchase Agreement”). Capitalized terms used but not otherwise defined herein have the respective meanings set forth in the Note Purchase Agreement.

This Independent Engineer’s Certificate (this “Certificate”) is being delivered by Enertis Chile SpA (“we” or the “Independent Engineer”) in connection with Section 10.8.(a) of the Note Purchase Agreement and the modification to the EPC Agreement relating to the Macao project (the “Macao EPC Agreement”) entered into by and between Macao Solar SpA (the “Obligor”) and Trina Solar Systems (Chile) SpA (the “EPC Contractor”).

The EPC Contractor issued a notice on August 2, 2024 (the “Notice”), which we have reviewed. The Notice informs about the EPC Contractor’s decision to replace the current SCADA system provider (Meteocontrol) to with Sunit SpA. Pursuant to section 4.3 and 4.11 (c) of the Macao EPC Agreement, Contractor requires the authorization of the Owner for subcontracting services to Sunit SpA, considering that it is not a pre-approved subcontractor under the Macao EPC Agreement, and it is the Owner’s intent to issue said authorization (the “Change Order”).

Based on our review of the Notice, the Change Order, and background information of Sunit SpA that was shared by the Obligor, we hereby certify that we are of the opinion, as of the date hereof, that:

- (i) after giving effect to such Change Order, (A) the ability of the Issuer or such other Obligor to achieve the Commercial Operation Date for the Macao project in accordance with the Construction Budget and Schedule for the Macao project by the COD Target Date relating to the Macao project or (B) the guaranteed performance levels under the applicable EPC Contract have not been materially adversely affected,
- (ii) no cost overruns have occurred or are continuing in respect of the Macao project that could reasonably be expected to result in the aggregate amount of Project Costs required to achieve the Commercial Operation Date for the Macao project by the COD Target Date for the Macao project exceeding Available Funding,
- (iii) such Change Order could not reasonably be expected to have a Material Adverse Effect or to result in a Default or an Event of Default,
- (iv) such Change Order does not amend, supplement or modify any provision relating to liquidated damages, payment schedule, or the amount or timing of

posting or content of performance bonds or guarantees under the applicable EPC Contract in any manner, taken as a whole, material and adverse to the Issuer or the Macao project, and

- (v) we understand the Issuer will deliver to the Noteholders a certificate signed by a Responsible Officer of the Issuer certifying the foregoing, which we confirm as the Independent Engineer.

This Certificate is solely for the benefit of the Purchasers under the Note Purchase Agreement. The Independent Engineer disclaims any obligation to update this Certificate. This Certificate is not intended to, and may not, be construed to benefit any party other than the Purchasers.

**[SIGNATURE PAGE FOLLOWS]**

IN WITNESS WHEREOF, the undersigned has executed this Certificate  
as of the date first set forth above.

ENERTIS CHILE SpA,  
as Independent Engineer

Nva. de Lyon N° 145, Oficina 503  
Providencia, Santiago, Chile
